In October 2021, The Lancet and Financial Times Commission on Governing health futures 2030 (GHFutures2030) launched a ground-breaking report that challenges policymakers and other actors to adopt an inclusive, value-based approach to governance in order to realise the potential of digital transformations to advance health and wellbeing for all.

The GHFutures2030 report has achieved considerable reach and impact in its first year but the work to translate its recommendations into action is just beginning. Join us in designing solutions for digital transformations that advance universal health coverage and deliver equitable benefits for young people’s health and wellbeing.

**Active members of GHFutures2030 Youth Network as of 01.09.22**
- 978K participants
- 223 Youth Network members
- 491 members
- 447 contributors to the GHFutures2030 report
- 2,3K community members
- 151 Twitter followers
- 431 young people involved in GHFutures2030 activities
- 67 countries
- 74 youth panelists
- 106 events
- 106 Commission reports and bilateral reports on 13 themes
